## The Transition of Social Protection in India: From Schemes to Systems

Avinash Mishra  
Madhubanti Dutta

Social security, as defined by the International Labour Organization (ILO), encompasses a wide range of protections provided by society to individuals and households. Its primary objectives are to ensure access to essential healthcare and guarantee income security, particularly in times of vulnerability such as old age, unemployment, sickness, disability, work-related injuries, maternity, or the loss of a breadwinner. Social security programmes encompass various benefits, including insurance, pensions, disability benefits, and unemployment benefits, among others. These instruments aim to establish a basic level of income and access to healthcare for all members of society while creating safety nets during times of crisis. The concept of social security is integral to achieving sustainable development and inclusive growth. It helps reduce poverty, inequality, and social exclusion, providing a foundation for individuals and families to live a dignified life and contribute to the economy. By providing income support

and access to essential services, social security plays a vital role in promoting social well-being, economic stability, and human development.

In pursuit of the Sustainable Development Goals (SDGs), social protection serves as a critical tool for empowering people, enhancing human capital, and creating resilient societies. It fosters economic productivity by enabling individuals to invest in education, health, and entrepreneurship, while simultaneously reducing the risk of falling into poverty due to unexpected events or economic downturns. Universal social protection is a shared responsibility, and its successful implementation requires the collaboration of governments, international organisations, civil society, and the private sector. By joint forces, stakeholders can strengthen social protection systems, ensure their sustainability, and contribute to the achievement of the SDGs' broader objectives. In conclusion, social security, in its broad definition, plays a vital role in promoting social justice, economic stability, and sustainable development.

## Marine Engineers: Leading the Blue Economy Revolution

Deepti Subba

Once a vast and untapped resource, the world's oceans are now gaining recognition as a critical player in the global economy.

A nation's exclusive economic zone offers bountiful opportunities. However, the challenges of venturing into this new frontier are numerous and complex, ranging from building and maintaining marine and coastal infrastructure to ensuring energy availability and maintaining biosecurity. For overcoming such obstacles and reaping the benefits of ocean resources India has formulated a Blue Economy framework. The framework seeks to unite researchers, scientists, engineers, technocrats and industry partners with diverse backgrounds to devise and implement ground breaking initiatives.

At the forefront of such endeavours are engineers with their expertise in shipping, renewable energy, remote monitoring technology, defence, and oil and gas industries.

Through collaboration with other disciplines, they are pioneering a new era of ocean utilisation. They are propelling the world towards a future where the blue economy is trusted, valued, and competitive on a global scale.

#### Marine Engineering: The Discipline

Marine engineering, a specialised branch of engineering, encompasses the design, construction, operation, and maintenance of various marine structures and systems. From ships and submarines to offshore platforms and underwater robotics, marine engineers play a

crucial role in ensuring the smooth operation and advancement of maritime technology.

The significance of marine engineering cannot be overstated, as it directly impacts global trade, defence, exploration, and environmental conservation. The vast majority of goods are transported via ships across oceans, making the shipping industry the backbone

of international trade. Marine engineers are essential in designing fuel-efficient vessels, optimising cargo capacity, and minimising environmental impact to ensure the sustainability of global shipping.

Additionally, marine engineering plays a pivotal role in naval architecture, supporting the development of advanced naval vessels and submarines for defence purposes. Furthermore, marine exploration and research rely on innovative marine technologies to study and understand our oceans' intricate ecosystems, biodiversity, and geology.

#### Education Background & Skill Requirements

To embark on a successful career in marine engineering, aspiring job seekers should acquire a solid educational

**Marine Engineers: Leading the Blue Economy Revolution**

JOB ROLE	RESPONSIBILITIES & QUALIFICATIONS
<b>Marine Design Engineer</b>	<ul style="list-style-type: none"> <li>• Design and develop various marine structures, vessels, and equipment.</li> <li>• Use advanced computer-aided design (CAD) software to create detailed plans and specifications for ships, offshore platforms, or marine renewable energy systems.</li> <li>• Bachelor's or master's degree in marine engineering, naval architecture, or a related field.</li> <li>• Good understanding of marine materials and construction techniques are important qualifications.</li> </ul>
<b>Naval Architect</b>	<ul style="list-style-type: none"> <li>• Working on various aspects of ship design, including hull shape, stability, propulsion and safety features.</li> <li>• Bachelor's or master's degree in naval architecture or marine engineering.</li> <li>• Strong mathematical and problem-solving skills, knowledge of ship design principles, and regulations.</li> </ul>
<b>Marine Systems Engineer</b>	<ul style="list-style-type: none"> <li>• Integration, operation, and maintenance of complex systems like propulsion systems, power generation, communication systems, and other essential equipment onboard ships and offshore installations.</li> <li>• Degree in marine engineering, electrical engineering, or a related field.</li> <li>• Practical experience with marine systems and strong troubleshooting skills.</li> </ul>
<b>Offshore Engineer</b>	<ul style="list-style-type: none"> <li>• Designing and constructing offshore structures (e.g., oil rigs, wind farms, subsea installations).</li> <li>• Degree in offshore engineering, civil engineering, or related field.</li> <li>• Knowledge of structural analysis, geotechnical engineering, and offshore safety regulations.</li> </ul>
<b>Maritime Transport Engineer</b>	<ul style="list-style-type: none"> <li>• Optimising transportation logistics and operations for shipping companies, including route analysis, cargo handling processes, and vessel performance improvement.</li> <li>• Degree in logistics, marine engineering, or a related field.</li> <li>• Knowledge of transportation economics, supply chain management, and maritime regulations.</li> </ul>
<b>Maritime Robotics Engineer</b>	<ul style="list-style-type: none"> <li>• Designing and developing autonomous and remotely operated underwater vehicles (ROVs) and drones for exploration, research, and underwater inspections.</li> <li>• Contributing to advancements in marine research, exploration, and resource management with innovative robotics technologies, improving safety and efficiency in underwater operations.</li> <li>• Degree in robotics, mechanical engineering, or a related field.</li> <li>• Experience with control systems, computer vision, and marine robotics.</li> </ul>
<b>Port and Harbour Engineer</b>	<ul style="list-style-type: none"> <li>• Planning, designing, and maintaining port facilities, such as piers, docks, jetties, and breakwaters, to ensure efficient vessel traffic and cargo operations.</li> <li>• Contributing significantly to the development and maintenance of crucial infrastructure for maritime trade and transportation, thereby enhancing trade competitiveness and fostering economic growth.</li> <li>• Degree in civil engineering, coastal engineering, or a related field.</li> <li>• Knowledge of port planning, coastal processes, and maritime regulations.</li> </ul>
<b>Marine Environmental Engineer</b>	<ul style="list-style-type: none"> <li>• Minimising the environmental impact of marine operations and projects by assessing potential risks, developing mitigation strategies, and ensuring compliance with environmental regulations.</li> <li>• Helping the industry operate sustainably, preserving marine ecosystems, and reducing pollution to support the long-term health of the blue economy.</li> <li>• Degree in environmental engineering, marine science, or a related field.</li> <li>• Knowledge of marine ecology, environmental laws, and pollution control methods.</li> </ul>
<b>Marine Biotechnology Engineer</b>	<ul style="list-style-type: none"> <li>• Exploring and developing biotechnological applications utilising marine organisms and resources, potentially working on projects related to pharmaceuticals, biofuels, or aquaculture.</li> <li>• Degree in biotechnology, marine biology, or a related field.</li> <li>• Knowledge of molecular biology, bioprocessing, and marine biodiversity.</li> </ul>
<b>Marine Safety and Compliance Engineer</b>	<ul style="list-style-type: none"> <li>• Ensuring maritime operations and facilities adhere to safety standards and regulatory requirements by conducting risk assessments, implementing safety protocols, and overseeing compliance audits.</li> <li>• Degree in marine engineering, safety engineering, or a related field.</li> <li>• Knowledge of international maritime safety regulations and risk assessment methodologies.</li> </ul>
<b>Offshore Operations Manager</b>	<ul style="list-style-type: none"> <li>• Overseeing day-to-day activities on offshore installations, coordinating personnel, logistics, and maintenance to ensure smooth operations and adherence to safety protocols.</li> <li>• Playing a key role in the successful and safe functioning of offshore facilities, utilising management skills to enhance operational efficiency and employee welfare.</li> <li>• Degree in engineering, business administration, or a related field.</li> <li>• Extensive experience in offshore operations and strong leadership abilities.</li> </ul>
<b>Marine Surveyor</b>	<ul style="list-style-type: none"> <li>• Inspecting and assessing the condition of ships, offshore structures, and marine equipment through surveys for regulatory compliance, pre-purchase inspections, and insurance purposes.</li> <li>• Degree in marine engineering, naval architecture, or a related field.</li> <li>• Certification from relevant professional bodies and practical experience in marine surveys.</li> </ul>
<b>Maritime Policy Analysts/Consultant</b>	<ul style="list-style-type: none"> <li>• Researching and analysing policies related to the maritime sector, assessing their economic, environmental, and social impacts, and providing recommendations to government agencies, international organizations, or private companies.</li> <li>• Playing a crucial role in shaping the direction of the maritime industry, with insights and recommendations influencing government decisions and industry practices, ensuring the sector's sustainability and growth.</li> <li>• Degree in maritime studies, public policy, or a related field.</li> <li>• Strong analytical and research skills, as well as knowledge of international maritime laws and conventions.</li> </ul>

Continued on page 3

## Marine Engineers: Leading the Blue Economy Revolution

foundation. A bachelor's degree in marine engineering, naval architecture, mechanical engineering, or a related field is typically required. Additionally, pursuing advanced degrees or certifications in specialised areas like marine robotics, renewable energy, or maritime management can enhance career prospects.

Marine engineering demands a diverse skill set, including but not limited to the following:

- **Technical proficiency:** Sound knowledge of engineering principles, fluid dynamics, thermodynamics, and material science.
- **Proficiency in Computer-Aided Design (CAD) and simulation tools** for design and analysis.
- **Problem-Solving Skills:** Ability to identify and resolve complex engineering challenges effectively.
- **Adaptability and willingness to work in a dynamic and challenging maritime environment.**
- **Effective communication skills and spirit of teamwork** as marine engineers often collaborate with multidisciplinary teams.
- **Regulatory knowledge and familiarity with international maritime regulations and safety standards.**

### Popular Entrance Exams for Admission to Marine Engineering

JEE Main	All India Common Entrance Test
MERI	Marine Engineering and Research Institute Entrance Examinations
GATE	Graduate Aptitude Test in Engineering
IMU CET	Indian Maritime University Common Entrance Test
JEE Advanced	IIT Joint Entrance Examination
TMICET	Tolani Maritime Institute Entrance Exam
HIMT	Entrance Exam for Hindustan Institute of Maritime Training

### Emerging Trends in Marine Engineering

Marine engineering is a dynamic field that continuously evolves with advancing technology, presenting exciting opportunities for job seekers. Notable trends shaping the industry include:

**Autonomous Marine Systems:** The emergence of unmanned underwater vehicles, autonomous ships, and remotely operated systems marks a revolutionary transformation in the marine industry. This trend has created a high demand for engineers skilled in robotics, artificial intelligence, and control systems, as they are instrumental in the development and maintenance of these cutting-edge technologies.

**Renewable Energy Solutions:** Growing concerns about climate change have prompted the marine industry to shift towards sustainable energy sources, such as offshore wind farms, tidal energy, and wave power. Marine engineers play a crucial role in the development, installation, and maintenance of these renewable energy solutions, contributing to environmental preservation.

**Green Shipping Technologies:** As part of their commitment to environmental responsibility, ship owners and operators are investing in eco-friendly solutions to reduce emissions and improve energy efficiency. This trend has led to a demand for marine engineers specialising in alternative fuels, hybrid propulsion systems, and emission control technologies to implement these sustainable initiatives.

**Digitalisation and Big Data:** The marine industry, like many other sectors, is embracing digitalisation and data analytics to optimise operations, enhance safety, and reduce costs. Job seekers equipped with skills in data science, cybersecurity, and digital infrastructure will find abundant opportunities in this era of digital transformation within marine engineering.

**Innovation and Research:** As the blue economy continues to evolve, marine engineers engage in groundbreaking research and innovation to unlock new possibilities and address emerging challenges. Their efforts drive technological advancements that lead to increased efficiency, reduced environmental impact, and improved profitability within the sector. Engineers are involved in the construction and maintenance of research vessels equipped with specialised scientific equipment for ocean exploration and data collection.

**Multi-Disciplinary Collaboration:** Marine engineers work hand in hand with experts from various fields, such as marine biologists, oceanographers, and environmental scientists, to create comprehensive solutions for the blue economy. Their ability to collaborate across disciplines ensures a holistic approach to ocean resource management.

### Navigating the Subjects

Embarking on a degree in marine engineering opens up a world of fascinating opportunities for students passionate about the sea and its engineering complexities. This diverse field combines various disciplines to equip aspiring marine engineers with the necessary knowledge and skills to design, operate, and maintain marine vessels and structures.

**Mathematics:** This subject introduces the essential mathematical concepts used in marine engineering. Topics such as calculus, algebra, and trigonometry form the backbone of engineering calculations and help students solve complex problems they'll encounter in their future career.

**English:** Being able to communicate ideas, instructions, and reports concisely is essential for successful collaborations and ensuring the safety and efficiency of

maritime operations.

**Basic Thermodynamics:** Thermodynamics is the study of the relationship between heat, energy, and temperature. In marine engineering, this knowledge is vital for designing efficient propulsion systems and understanding the behaviour of engines and machinery aboard ships.

**Engineering Mechanics:** This subject discusses mechanical engineering concepts relevant to the maritime industry, such as forces, motion, and the principles behind various mechanical systems on ships. Students gain insights into how forces impact vessel stability, structural integrity, and safety.

**Technology Workshop:** In the workshop, marine engineering students get hands-on experience with various technological aspects of their field. This practical knowledge is invaluable, as it allows them to work with tools, equipment, and materials used in shipbuilding, repair, and maintenance.

**Geometrical Drawing and Engineering & Machine Drawing:** Geometrical Drawing focuses on the construction of geometric shapes and instruments used in marine engineering, while Engineering & Machine Drawing delves into the detailed drawings of machines used in maritime operations.

**Seamanship, Elementary Navigation, and Survival at Sea:** In these subjects, students learn about the duties and responsibilities of seamen, basic navigation techniques, and survival skills at sea.

**Applied Thermodynamics:** Building upon the foundation laid in Basic Thermodynamics, this subject explores more advanced thermodynamic concepts relevant to marine engineering. Students delve into the intricacies of marine power plants and propulsion systems, optimising energy usage and enhancing vessel performance.

**Strength of Materials:** The structural integrity of marine vessels is paramount for their safety and reliability. Strength of Materials covers the properties of materials used in shipbuilding and their capacity to withstand different loads and stresses encountered during a voyage.

**Computational Mathematics:** Computational mathematics is a specialised field that equips marine engineers with the skills to measure key parameters during sea voyages. These measurements are crucial for monitoring the vessel's performance, fuel efficiency, and environmental impact.

**Electrical Machines:** This subject provides insights into the design, operation, and maintenance of electrical machinery aboard various types of vessels.

**Fluid Mechanics:** In marine engineering, this knowledge is vital for designing efficient hulls, propellers, and fluid systems that ensure smooth sailing and propulsion.

**Marine Boilers:** Marine boilers are central to a ship's propulsion and power generation. This subject offers an in-depth study of marine boilers, their functions, and maintenance requirements.

**Maintenance and Repair:** Marine engineers must be well-versed in the maintenance and repair of ship machinery. This subject equips students with the skills to diagnose and fix various equipment issues that may arise during a voyage.

**Tanker Operations:** Tanker operations require specialised knowledge due to the unique challenges associated with transporting liquid cargoes. This subject covers various aspects of tanker operations, ensuring that students are prepared for this crucial segment of the maritime industry.

**Ship Fire Prevention:** Ship fires pose a significant threat to maritime safety. This subject teaches students how to prevent, mitigate, and respond to fire incidents on board vessels.

**Hydraulic Machines:** Hydraulic machines play a vital role in powering various marine systems and equipment. This subject provides students with an overview and in-depth understanding of these essential machines.

**Ship Construction:** This subject delves into the intricate process of ship construction, covering design principles, material selection, and the latest advancements in shipbuilding techniques.

### Elective Subjects for Marine Engineering

In addition to the core subjects, marine engineering students often have the option to choose from a range of elective subjects to tailor their learning experience. Some of these elective subjects include:

**Advanced Marine Heat Engines:** Exploring turbo blowers, compressors, heat exchangers, and more to enhance vessel efficiency and power generation.

**Renewable Energy Sources & Applications:** Understanding how renewable energy technologies can be harnessed for eco-friendly maritime operations.

**Environmental Science & Technology:** Examining the impact of maritime activities on the environment and exploring sustainable solutions.

**Advanced Material Science & Surface Coating Engineering:** Discovering advanced surface coating materials to enhance vessel durability and performance.

Pursuing a degree in marine engineering is an exciting journey that combines science, technology, and innovation to propel the maritime world forward. From understanding the basics of mathematics and thermodynamics to exploring advanced subjects like renewable energy and environmental science, marine engineering students are equipped with a diverse skill set to contribute meaningfully to the maritime industry. With hands-on experiences, practical training, and specialised elective options, these students become well-prepared to embark on a rewarding career at sea, playing a crucial role in shaping the future of marine engineering and navigation.

## The Transition of Social Protection in India ...

### Sustainable Approach

A sustainable financing approach towards social protection is vital for ensuring the resilience and effectiveness of social security systems. By combining progressive universalism, balanced funding sources, inclusive design, effective delivery mechanisms, evidence-based policy, public-private partnerships, cost-benefit analysis, and long-term planning, countries can create social protection systems that provide equitable support to all citizens and protect the most vulnerable in society. A well-financed and efficiently managed social protection system not only enhances the well-being of individuals and households but also contributes to broader economic and social development goals. A sustainable financing approach towards social protection is essential to ensure the long-term viability and effectiveness of social security systems. As countries endeavor to establish robust social protection systems that enhance the economic resilience of vulnerable populations and offer equitable protection for all, careful attention must be given to financing considerations.

#### 1. Progressive Universalism:

A sustainable financing approach should be grounded in the principle of progressive universalism. This means that social protection systems should strive to provide essential support to all citizens while targeting additional resources towards those who are most in need. By combining universal coverage with targeted assistance, countries can ensure that everyone has access to basic social security, while also prioritising support for the most vulnerable.

#### 2. Balanced Funding Sources:

To achieve financial sustainability, social protection systems should strike a balance between state-sponsored and privately-funded schemes. Governments play a crucial role in funding social protection programs, but partnerships with private entities, non-governmental organisations, and the business sector can help diversify funding sources and ensure a more resilient financial base.

#### 3. Inclusive Design:

The design of social protection programs should take into account the diverse needs of the population. Different demographic groups may require tailored solutions, and consideration should be given to the unique circumstances of women, children, elderly, persons with disabilities, and other vulnerable groups.

#### 4. Effective Last-Mile Delivery:

Efficient and effective delivery mechanisms are essential to ensure that the benefits of social protection reach the intended beneficiaries through DBT. Digitisation, streamlined administrative processes, and robust monitoring systems can enhance the efficiency of delivery, minimising leakages and ensuring resources are directed to those who need them the most.

#### 5. Evidence-Based Policy:

A sustainable financing approach should be informed by data and evidence. Governments should invest in research and data collection to understand the needs and challenges of their populations accurately. Evidence-based policymaking can lead to more targeted and cost-effective social protection programs.

#### 6. Public-Private Partnerships:

Engaging the private sector through public-private partnerships can bring in

additional resources and expertise to support social protection initiatives. Collaboration with private entities can help design innovative financing models and expand the reach of social protection programs.

#### 7. Cost-Benefit Analysis:

Assessing the cost-effectiveness and long-term impact of social protection schemes is crucial. Conducting rigorous cost-benefit analyses can help identify the most efficient programs and allocate resources strategically to achieve the desired outcomes.

#### 8. Long-Term Planning

Social protection systems should be planned with a long-term perspective, taking into account demographic changes, economic fluctuations, and evolving social needs. By adopting a forward-looking approach, countries can build sustainable systems that adapt to changing circumstances over time.

The global experience indicates that achieving universal and adequate social protection is challenging when there are numerous state and central schemes operating independently without coordination. Many emerging economies have recognized the importance of comprehensive coverage and have successfully pursued program consolidation and convergence to achieve their social protection goals.

For instance, countries like Brazil have streamlined their social protection initiatives by integrating various schemes into a cohesive system. This approach combines the delivery of cash transfers to impoverished households with the provision of health, nutrition, and education services. This integration allows for a more efficient and holistic support system for those in need.

Similarly, China and Indonesia have taken a focused approach by implementing fewer than ten national social assistance programs each. In contrast, India has historically managed many benefit-transfer schemes at both the national and state levels, which can lead to fragmentation and inefficiencies, if not monitored rigorously.

By streamlining and consolidating social protection schemes, countries can achieve several benefits:

#### 1. Enhanced Efficiency:

An integrated system reduces administrative burden and overlaps, leading to cost savings and better resource allocation.

#### 2. Improved Targeting:

Consolidation allows for more accurate identification and targeting of beneficiaries, ensuring that assistance reaches those who need it the most.

#### 3. Increased Coverage:

Comprehensive programs have the potential to cover a larger portion of the population, reducing exclusion errors.

#### 4. Holistic Support:

Integrating different services can lead to a more comprehensive support structure, addressing multiple dimensions of vulnerability.

#### 5. Sustainability:

A consolidated system may be easier to manage, maintain, and adapt to changing circumstances over time.

However, it is crucial to recognize that each country's social protection needs and context are unique. While lessons from other countries can offer valuable insights, the design and implementation of social protection systems must be tailored to suit the specific circumstances

and challenges faced by each nation.

Moving towards a more integrated and streamlined social protection system is a complex process that requires careful planning, coordination, and political will. It involves collaboration between various government departments, stakeholders, and civil society to ensure the effectiveness and success of the reforms.

Prime Minister Shri Narendra Modi's vision of tailored social protection schemes highlights the crucial importance of recognizing and addressing the diverse socio-economic circumstances of country's population. In the context of India, a nation known for its vast cultural, economic, and regional diversity, the government has implemented a range of social protection programs to uplift the disadvantaged, enhance livelihoods, and foster inclusive growth. These initiatives are meticulously designed to cater to the unique challenges faced by different segments of the population, ensuring a holistic approach to social welfare and development.

#### 1. Pradhan Mantri Ujjwala Yojana:

PMUY is a social welfare scheme aimed at providing clean cooking fuel, primarily LPG, to women living below the poverty line. The scheme was launched to address the health hazards caused by traditional cooking fuels like wood and coal, particularly for women and children.

#### 2. Ration Distribution :

The Public Distribution System (PDS) is a food security programme that provides subsidized food grains to eligible beneficiaries through Fair Price Shops. This initiative ensures that essential food items are available to economically disadvantaged households at affordable prices.

#### 3. MUDRA (Micro Units Development and Refinance Agency) Yojana:

MUDRA is a financial inclusion scheme launched to provide loans to micro and small enterprises. It aims to support small entrepreneurs and promote self-employment by offering financial assistance through various lending institutions.

#### 4. Pradhan Mantri Gram Sadak Yojana:

PMGSY is a rural road connectivity program aimed at providing all-weather road access to remote and unconnected villages in India. The scheme focuses on improving rural infrastructure and facilitating better connectivity for economic and social development.

#### 5. Pradhan Mantri Awas Yojana :

PMAY is a housing scheme launched to provide affordable housing to the urban and rural poor. The initiative aims to address the housing shortage in the country and improve living conditions for vulnerable sections of society.

#### 6. Old Age Pension:

The government provides various old-age pension schemes, such as the National Social Assistance Programme (NSAP), to support senior citizens who do not have sufficient means of income. These pensions act as a social safety net for the elderly, ensuring financial security during their old age.

#### 7. Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana:

Ayushman Bharat is a comprehensive health insurance scheme that aims to provide health coverage to vulnerable families, especially those below the poverty line. PM-JAY offers cashless treatment for secondary and tertiary healthcare services to beneficiaries at empaneled hospitals.

#### 8. National Social Assistance Programme:

The National Social Assistance Programme (NSAP) encompasses various pension schemes catering to the elderly, widows, and disabled individuals. This targeted approach provides a social safety net to the most vulnerable groups, ensuring they receive financial support during their old age or disability, preventing them from falling into destitution.

#### 9. Pradhan Mantri Suraksha Bima Yojana and Pradhan Mantri Jeevan Jyoti Bima Yojana:

The Pradhan Mantri Suraksha Bima Yojana (PMSBY) and Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY) exemplify tailored social protection through insurance coverage. These schemes provide affordable accidental and life insurance to economically vulnerable sections of the population. In the event of unforeseen adversities, such as accidents or loss of life, these insurance covers offer financial support to families, easing their burden during challenging times.

#### 10. Pradhan Mantri Jan Dhan Yojana:

Financial inclusion is a major challenge in India, particularly among the economically vulnerable sections. The Pradhan Mantri Jan Dhan Yojana this scheme is a tailored approach to tackle this issue head-on. By providing basic banking services such as savings accounts, remittances, credit, insurance, and pension to the unbanked and underbanked, PMJDY seeks to integrate millions into the formal banking system, promoting financial security and empowering individuals and families economically.

#### 11. Mahatma Gandhi National Rural Employment Guarantee Act:

The Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) is a landmark initiative that directly addresses the issue of rural unemployment and poverty. Tailored to India's predominantly agrarian economy, this scheme guarantees 100 days of wage employment to every rural household, allowing them to earn a livelihood while creating productive assets in villages. This scheme not only uplifts the socio-economic status of the rural poor but also contributes to sustainable rural development.

#### 12. Triple Talaq (Instant Divorce) Ban:

The government enacted a law to criminalize the practice of instant divorce (triple talaq) in Muslim marriages. The law was introduced to protect the rights and dignity of Muslim women and ensure gender equality in the realm of divorce.

#### Conclusion:

Transforming from individual welfare schemes to integrated social protection systems represents the future of social protection in India. This transition aims to create a comprehensive and cohesive approach that addresses various social and economic vulnerabilities by moving away from fragmented initiatives. The vision includes greater integration, universality, and data-driven efficiency, enabling seamless access to essential services for all citizens. By shifting the focus from schemes to systems, India seeks to build a sustainable and adaptive framework that caters to the diverse needs of its population.

# Headquarters, Coast Guard Region (North-West)

Post Box No. 09, Sector-11, Gandhinagar-382010

Applications from willing and eligible candidates are invited for filling up following posts on direct recruitment basis :-

Sl.	Name of Post	Category/No. of Vacancy (*)	Place of Work	Pay Level	Minimum Qualification	Age
(a)	Engine Driver (Group 'C', Non-Gazetted Non-Ministerial)	05 (UR-03, OBC-01 & SC-01)	Gujarat Region	PL-04 in Pay Matrix	<b>Essential:</b> - (i) Matriculation or equivalent. (ii) Certificate of competency as Engine Driver from a recognized Government Institute or equivalent. <b>Desirable:</b> - (i) Two years service as Sarang on a Vessel of over four hundred Boat Horse Power.	18 to 30 years. (Relaxable for Government Servants upto 40 years, SC, ST & OBC in accordance with the instructions/orders issued by the Central Government from time to time )
(b)	Lascar	07 (UR-02, EWS-01, OBC-02, SC- 01 & ST-01)	Gujarat Region	PL-01 in Pay Matrix	<b>Essential:</b> - (i) Matriculation pass or its equivalent from recognized boards.. (ii) Three years experience in service on ship or craft.	18 to 30 years. (Relaxable for Govt. Servant upto 40 years, SC, ST and OBC candidates as per Govt. instructions issued from time to time.)
(c)	Civilian Motor Transport Driver (OG) Group 'C, Non-Gazetted, Non-Ministerial.	02 (EWS-01 & SC-01)	Gujarat Region	PL-02 in Pay Matrix	<b>Essential:</b> - (i) 10th Standard Pass. (ii) Must possess valid driving license for both heavy and light motor vehicles. (iii) Should have at least two years experience in driving motor vehicles. (iv) Knowledge of motor mechanism (should be able to remove minor defects in vehicles).	18 to 27 years. (Relaxable for Government Servants, Scheduled Castes, Scheduled Tribes and Other Backward Class candidates as per Government instructions issued from time to time).
(d)	MTS (Mali)	01 (UR-01)	Gujarat Region	PL-01 in Pay Matrix	<b>Essential:</b> - (i) Matriculation or equivalent pass. (ii) Two years experience as Mali in any nursery or organization	18 to 27 years. (Relaxable for Government Servants, Scheduled Castes, Scheduled Tribes and Other Backward Class candidates as per Government instructions issued from time to time).
(e)	MTS (Peon)	02 (EWS-01, OBC-01)	Gujarat Region	PL-01 in Pay Matrix	<b>Essential:</b> - (a) Matriculation or equivalent pass. (b) Two years' experience as Office Attendant.	18-27 years (Relaxable for Government Servants, Schdeduled Castes, Scheduled Tribes and Other Backward Class candidates as per Government instructions issued from time to time).

\* Subject to change.

The details of above mentioned posts can be seen on the web portal of Indian Coast Guard i.e. [www.indiancoastguard.gov.in](http://www.indiancoastguard.gov.in). Applications of the eligible candidates, complete in all respect, should reach Headquarters, Coast Guard Region (North-West), Gandhinagar within 45 days from the date of publication of the advertisement in Employment News.

\* Vacancies may increase or decrease subjected to change.

## Common Admission Test CAT 2023

The Indian Institutes of Management will conduct a computer-based Common Admission Test 2023 (CAT 2023) on **November 26, 2023** in three sessions. Detailed information on CAT 2023 may be obtained from the CAT website.

CAT website: [www.iimcat.ac.in](http://www.iimcat.ac.in)

CAT 2023 is a prerequisite for admission to various Post Graduate and Fellow/Doctorate programmes of IIMs. CAT 2023 scores are allowed to be used by listed non-IIM member institutions. A list of such institutions is provided on the CAT website. IIMs have no role in the selection process of non-IIM institutions.

#### CAT 2023 ELIGIBILITY

Please refer to the detailed notification on the CAT website. **Applicants should note that mere fulfillment of the minimum eligibility criteria will not ensure consideration for shortlisting by IIMs.**

#### RESERVATIONS

Refer to the CAT website for information regarding reservation of seats for various categories of applicants. **No change in the category will be entertained after CAT registration. The applicants are advised to pay attention while registering.**

#### REGISTRATION FEES

₹ 1200 for SC, ST and PwD category candidates.

₹ 2400 for all other categories of candidates.

Please note that a candidate needs to pay the registration fees only once,

irrespective of the number of institutes he/she is applying for. Fees once paid cannot be refunded under any circumstances.

#### IMPORTANT DATES

Registration : **August 02, 2023**  
opens (10:00 am)

Registration : **September 13, 2023**  
closes (5:00 pm)

Admit card : **October 25 -**  
download **November 26, 2023**

Test date : **November 26, 2023**

Result : **Second week of**

declaration **January, 2024**  
(Tentative)

#### TEST CENTRES

CAT will be conducted in test centres spread across around 155 test cities. Candidates will be given the option to select any six test cities in order of their preference.

#### DISCLAIMER

This advertisement is only intended to be an announcement for CAT 2023. For COVID-19 related updates, detailed information, rules and procedures regarding CAT and the admission process of various IIMs, candidates should visit the CAT website.

Any dispute concerning CAT 2023 would be subject to the jurisdiction of the competent Courts within the territorial jurisdiction of the City of Lucknow only.

#### IMPORTANT

**Candidates must declare and maintain a valid and unique email account and a mobile phone number throughout the selection process.**

## RECRUITMENT FOR VARIOUS POSTS

Advertisement No. 04/2023

Uranium Corporation of India Limited was incorporated on 4th October 1967. It is a Public Sector Enterprise under the Department of Atomic Energy with a special standing at the forefront of Nuclear Power cycle. Fulfilling the requirement of uranium for the Pressurized Heavy Water Reactors. UCIL plays a very significant role in nuclear power generation of the country. UCIL is an ISO 9001:2015, 14001:2015 & IS 18001:2007 company and has adopted modern technologies for its mines and process plants. The Company operates six underground mines (Bagjata, Jaduguda, Bhatin, Narwapahar, Turamdih and Mohuldih) and one open pit mine (Banduhurang) in the State of Jharkhand. Ore produced from these mines are processed in two process plants located at Jaduguda and Turamdih. UCIL is also operating one underground mine and process plant at Tummalapalle in Andhra Pradesh. The Company has taken up expansion of some of its operations in Jharkhand and started pre-project activities to set up new mines and plants in different parts of the country. UCIL invites applications from Indian citizens for the following posts.

# Towards Achieving Sustainable Development Goals

## EN EXPLAINS

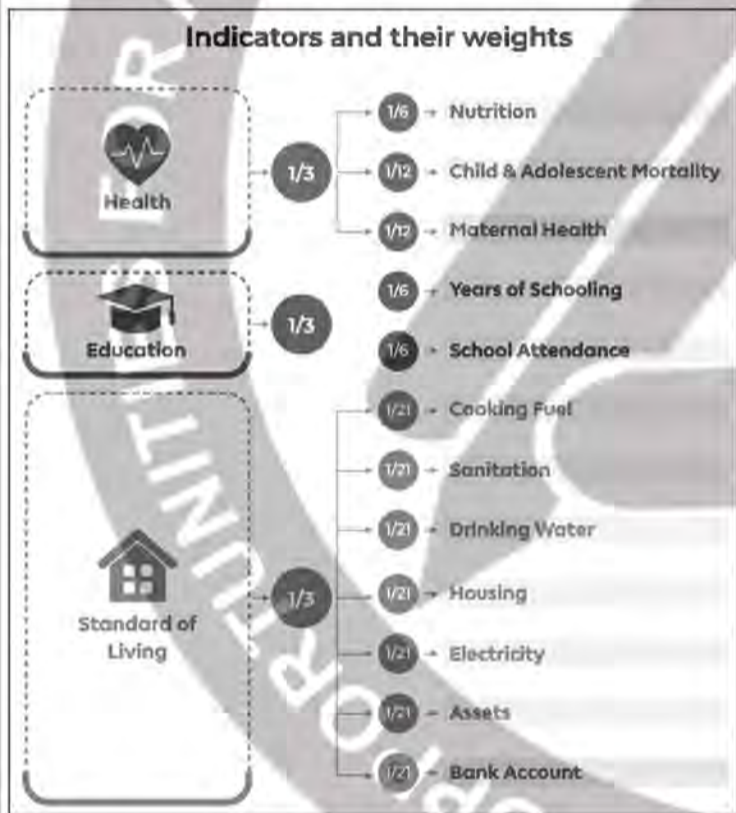

India has been making continuous strides in achieving the global Sustainable Development Goals, by embracing the goals and targets and integrating them into its national development agenda. Sustainable development requires sustained action over time. The country has been consistently putting efforts in implementing sustainable solutions for the world's greatest challenges ranging from poverty to climate change, thus creating a way for a sustainable and resilient future for generations to come.

NITI Aayog, on July 17, 2023, released its 'National Multidimensional Poverty Index: A Progress Review 2023' report. Based on the latest National Family Health Survey [NFHS-5 (2019-21)], this second edition of the National Multidimensional Poverty Index (MPI) represents India's progress in reducing multidimensional poverty between the two surveys, NFHS-4 (2015-16) and NFHS-5 (2019-21). It builds on the Baseline

agency for MPI, has been responsible for constructing an indigenized index for monitoring the performance of States and Union Territories in addressing multidimensional poverty. In order to institutionalise this, NITI Aayog constituted an inter-ministerial MPI Coordination Committee (MPICC) including Ministries and departments pertaining to areas such as health, education, nutrition, rural development, drinking water, sanitation, electricity, and urban development, among others. It also included experts from the Ministry of Statistics and Programme Implementation (MoSPI) and technical partners - OPHI and UNDP. The composition of the MPICC drew from the multidimensional nature of the indicators and sub-indicators within the index. This brought forth cross-sectoral perspectives on policies and interventions needed to improve achievements at the level of households.

### Methodology

Historically, poverty estimation has predominantly relied on income as the sole indicator.

Report of India's National MPI launched in November 2021.

### The Index

The development of the National Multidimensional Poverty Index of India is an important contribution towards instituting a public policy tool which monitors multidimensional poverty, and informs evidence-based and focused interventions, thereby ensuring that no one is left behind. India's MPI is the first-of-its-kind index which measures the globally accepted and robust methodology developed by the Oxford Poverty and Human Development Initiative (OPHI) and the United Nations Development Programme (UNDP) which have been key partners in ensuring the public policy utility and technical rigour of the Index. Importantly, as a measure of multidimensional poverty, it captures multiple and simultaneous deprivations faced by households.

NITI Aayog, as the nodal

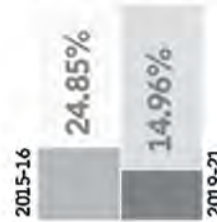

However, the Global Multidimensional Poverty Index (MPI), based on the Alkire-Foster (AF) methodology, captures overlapping deprivations in health, education, and living standards.

Like the global MPI, India's national MPI has three equally-weighted dimensions - Health, Education, and Standard of Living - which are represented by 12 SDG-aligned indicators.

The report presents an in-depth analysis of the Headcount Ratio and Intensity of Multidimensional Poverty at the national, State/UT, and district levels. Headcount ratio is the proportion of multidimensionally poor in the population, which is arrived at by dividing the number of multidimensionally poor persons by total population. Intensity of poverty is the average proportion of deprivations which is experienced by multidimensionally poor individuals. To compute intensity, the weighted deprivation scores of all poor people are summed

## Highlights: MPI Progress Report 2023

**Steep decline in Poverty Headcount Ratio**

**135 million (13.5 crore)**

**people exited multidimensional poverty between 2015-16 and 2019-21**

**India on track to achieve**

**SDG Target 1.2**

**(reducing multi-dimensional poverty by at least half) much ahead of 2030**

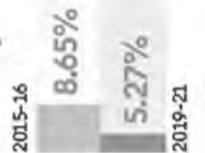

**All 12 indicators have shown improvement**

suggesting that impact of Government interventions is increasingly visible on ground

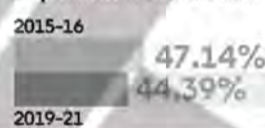

**Fastest decline in percentage of multidimensional poor in rural areas from**

**Reduction in the incidence of poverty in urban areas**

**The Intensity of poverty, which measures the average deprivation among the people living in multidimensional poverty improved from about**

**UP, Bihar, MP, Odisha and Rajasthan recorded steepest decline in number of MPI poor**

**Improvement in nutrition, years of schooling, sanitation, and cooking fuel played a significant role in reducing the MPI value**

and then divided by the total number of poor people. MPI value is arrived at by multiplying the Headcount Ratio and the Intensity of Poverty, reflecting both the share of people in poverty and the degree to which they are deprived. According to the AF methodology, an individual is considered MPI poor if their deprivation score equals or exceeds the poverty cutoff of 33.33%.

### Takeaways

#### Steep Decline in Poverty

India has achieved a remarkable reduction in its MPI value and Headcount Ratio between 2015-16 and 2019-21, indicating success of the country's commitment and action to address the multidimensional nature of poverty through its multisectoral approach. The MPI estimates highlight a near-halving of India's national MPI value and decline in the proportion of population in multidimensional poverty from 24.85% to 14.96% between

2015-16 and 2019-21. This indicates that a record 13.5 crore people moved out of multidimensional poverty between 2015-16 and 2019-21. At the same time, the Intensity of Poverty also reduced from 47.14% to 44.39%.

#### Disparities across Rural and Urban Areas

While disparities in multidimensional poverty still exist between rural and urban areas, the reduction in the MPI value has been pro-poor in absolute terms. The rural areas witnessed the fastest decline in poverty from 32.59% to 19.28%. During the same period, the urban areas saw a reduction in poverty from 8.65% to 5.27%.

#### Performance of States/UTs

The MPI estimates show that States/UTs have displayed notable improvements in their MPI score from 2015-16 to 2019-21. Bihar, the state with the highest MPI value in NFHS-4 (2015-16), saw the fastest reduction in MPI value in

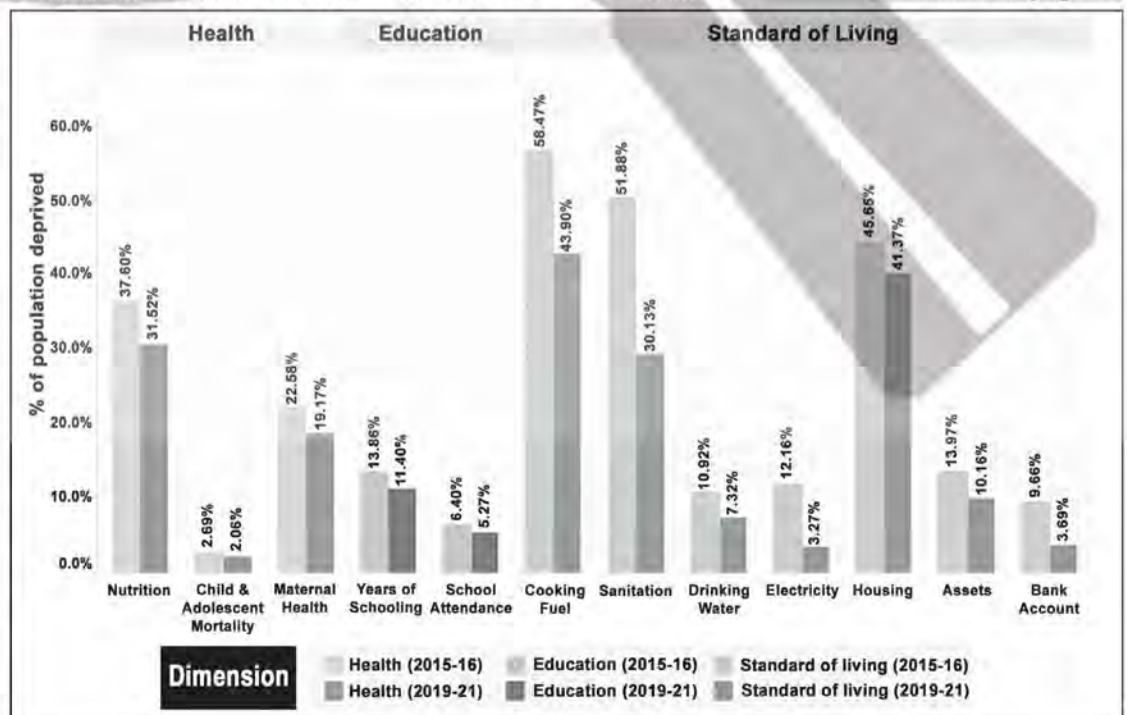

absolute terms, with the proportion of multidimensional poor reducing from 51.89% to 33.76% in 2019-21. The next fastest reduction in the MPI value was seen in Madhya Pradesh and Uttar Pradesh.

In terms of number of MPI poor, Uttar Pradesh topped the list with 3.43 crore people exiting multidimensional poverty in the last five years, followed by Bihar (2.25 crore) and Madhya Pradesh (1.36 crore).

#### Marked improvement is witnessed across all 12 indicators

Since the data reference period of NFHS 2015-16, India has made remarkable strides through flagship programmatic interventions in housing, electricity, sanitation, drinking water, and cooking fuel, among others. Apart from building infrastructure and ensuring basic services, focused initiatives to improve health and nutritional

**Towards Achieving Sustainable ...**

outcomes have been undertaken expeditiously during this period.

As a result, all the 12 indicators across the three dimensions - Health, Education and Standard of Living - saw statistically significant reduction across the two time periods. Deprivations in sanitation (reduction by 21.8% points) and cooking fuel (reduction by 14.6% points) fell the most during the period from 2015-16 to 2019-21. Overall, progress in nutrition, years of schooling, sanitation, and cooking fuel has been the significant contributor to the decline in MPI value though there is further scope to make improvements.

India's National MPI Report underlines the Government's commitment to understanding, measuring, and addressing the many dimensions of poverty and leveraging this understanding as a key tool in policymaking. India's stellar progress on the national MPI between 2015-16 and 2019-21 reflects the Government's commitment to improving the quality of people's lives - through targeted policies, schemes, and developmental programmes rolled out at both the national and sub-national

levels. The Government's focus on investments in critical areas of education, nutrition, water, sanitation, cooking fuel, electricity, and housing has played a pivotal role in driving these positive outcomes. Key Government schemes such as Swachh Bharat Mission (SBM), Jal Jeevan Mission (JJM), Poshan Abhiyan, Samagra Shiksha, Pradhan Mantri Sahaj Bijli Har Ghar Yojana (Saubhagya), Pradhan Mantri Ujjwala Yojana (PMUY), Pradhan Mantri Jan Dhan Yojana (PMJDY), Pradhan Mantri Awas Yojana (PMAY) and many more have contributed significantly in driving the tremendous progress presented in this report.

**BEST ENTRY FOR**

ISSUE DATED 15 - 21 July 2023

**Question: In a significant move towards empowering rural artisans and promoting authentic handicrafts and handlooms, a mobile app 'eSARAS' has been launched. This app aims to provide better marketing support and e-commerce opportunities for products made by women self-help groups (SHGs). The Government in the past few years has taken several steps to empower SHGs. Do you know of any SHG being run by women which manufactures handicrafts/handlooms? How do you think such e-commerce opportunities would benefit them?**

**Aditi Sharma**  
New Delhi

Female Self-Help Groups (SHGs) are strong, locally based organizations made up of women who get together for social, economic, and emotional assistance. These organizations work to solve the problems that women, particularly those who live in rural and underserved areas, confront. SHGs give women a platform to pool their resources, obtain financial services, and take part in activities that generate money by working together.

A group of women from my village Beri, near Rohtak, Haryana have been manufacturing ceramic pots and crockery for a few years. They sell these in nearby areas and locals are their regular customers. Their goods are even sold in markets in Delhi. Most of these women belong to families

which fall under the BPL (below poverty line). This has been a great source of income generation for them. Not only are they earning well, but are also earning by doing a respectable job which matters to them the most.

E-commerce opportunities give SHGs an innovative vehicle that enables them to grow their clientele, boost their income, and improve their level of economic independence. By empowering women in SHGs to use digital technology, communities as a whole will grow and their socioeconomic development will be supported. SHGs can become adaptive by embracing e-commerce, especially during trying times like the COVID-19 epidemic since they can keep selling online even when physical marketplaces are impacted. It also creates chances for SHGs to work with other companies, NGOs, and governmental organizations. Such alliances may result in the sharing of resources and opening up of new markets. Digital transactions are made easier by e-commerce, giving SHG members access to online banking and payment systems. This encourages women's financial inclusion and financial literacy. Thus, there are various benefits that SHGs can avail from the development of e-commerce websites.

## NATIONAL

### India is a Reliable Semiconductor Supplier: PM

Prime Minister Shri Narendra Modi urged international private players to invest in India's semiconductor sector during the 'Semicon India 2023' conclave in Gandhinagar. He emphasised India's stable government, expanding infrastructure, technology development, and abundant talent pool, making it an attractive destination for semiconductor investments. The government is providing 50% financial assistance to foster a vibrant semiconductor ecosystem. Over 300 educational institutes offer specialised academic courses dedicated to the semiconductor sector, creating a skilled pool of engineers. The three-day conclave, organised by the Ministry of Electronics and Information Technology, showcased India's semiconductor strategy, propelling the nation to the forefront of the industry.

### PM Urges G20 to Embrace 'Climate Action' & Protect Mother Earth

In a virtual address to the G20 Environment and Climate Ministers' Meet, Prime Minister Shri Narendra Modi emphasised the importance of climate action and called for greater protection of Mother Earth. He stressed the significance of 'Antyodaya,' ensuring the rise of the last person in society while addressing climate change. PM Modi proudly shared India's progress in renewable energy and biodiversity conservation, highlighting initiatives like 'Project Tiger' and 'Namami Gange' to restore and protect ecosystems. He called on the G20 to adopt 'G20 High-Level Principles for a Sustainable and Resilient Blue and Ocean-based Economy' and urged collective action to end plastic pollution. PM Modi expressed confidence that with unified efforts, 'Vasudhaiva Kutumbakam' - One Earth, One Family, One Future - can be achieved.

### Unique Initiative 'Mera Gaon Meri Dharohar' to Connect Villages Virtually

Union Minister of State for Culture Ms. Meenakshi Lekhi launched 'Mera Gaon Meri Dharohar,' a novel initiative under Azadi ka Amrit Mahotsav, in New Delhi on July 27. Part of the National Mission on Cultural Mapping, the pan-India initiative aims to connect people with villages across India through the virtual platform mgmd.gov.in. During the inauguration, a captivating laser projection on the Qutub Minar showcased the unique cultural themes of various Indian villages. Ms. Lekhi encouraged everyone to explore the web portal and experience the diverse and rich cultural heritage of India.

### India AI and Meta Join Forces to Advance AI & Emerging Technologies

'India AI,' an initiative under Digital India Corporation, and Meta, India, signed a Memorandum of Understanding (MoU) to foster advancements in AI and Emerging Technologies. The MoU, signed by 'India AI' CEO Shri Abhishek Singh and Meta's Director & Head of Public Policy, Shri Shivnath Thukral, aims to establish a collaboration framework for joint research and development endeavors. They will explore building datasets in Indian languages to enable translation and large language models, prioritising low-resource languages to foster social inclusion and improve government services. The partnership will make Meta's open-source AI models available for use within the Indian AI ecosystem. Additionally, the collaboration seeks to enhance AI compute resource accessibility for researchers and startups.

## INTERNATIONAL

### India and Japan Seek Collaboration in Critical and Emerging Technologies

External Affairs Minister Dr. S Jaishankar and his Japanese counterpart Mr. Hayashi Yoshimasa reviewed progress in the India-Japan Special Strategic and Global Partnership on July 27 in New Delhi. They highlighted the aim of achieving 5 trillion yen Japanese investment in India between 2022-2027 and discussed deepening Defense Equipment and Technology Cooperation. The ministers emphasised the pivotal role of a robust and enduring partnership between India and Japan in fostering a free, open, and prosperous Indo-Pacific region based on inclusivity and rules. The two sides also explored cooperation under multilateral and plurilateral frameworks, including the Quad alliance. They acknowledged the significance of people-to-people exchanges and deliberated on facilitating the movement of skilled human resources from India to Japan.

### India and Australia Strengthen Bilateral Defence Engagements in 8th Defence Policy Talks

India and Australia conducted the 8th India-Australia Defence Policy Talks in Canberra, exploring new initiatives to bolster bilateral defence cooperation. Both nations reaffirmed their commitment to the Comprehensive Strategic Partnership based on shared values of democracy and the rule of law. Co-chaired by Special Secretary in the Ministry of Defence Ms. Nivedita Shukla Verma and Acting Deputy Secretary in the Department of Defence, Australia Mr. Steven Moore, the talks focused on enhancing partnerships in co-development and co-production of defence equipment. India highlighted its defence industry's potential to cooperate with the Australian Armed forces in shipbuilding and maintenance plans, strengthening their shared vision for a free, open, inclusive, and prosperous Indo-Pacific region.

### UK Announces Second Ballot of India Young Professional Scheme

The British government has opened its second ballot for the UK-India Young Professional Scheme, granting young Indians aged 18 to 30 with graduate-level qualifications the chance to live, work, or study in the UK for up to 2 years. The UK-India Young Professionals Scheme visa allows eligible candidates to enter and exit the UK freely within the visa's validity. The scheme launched earlier this year offers 3,000 places, with most allocated during the first ballot in the month of February. The remaining spots will be randomly selected in the second ballot. Interested applicants must meet financial and other requirements and travel to the UK within six months of applying for the visa.

### India and Lao PDR Sign Deals for Quick Impact Projects in Education, Health, and More

India and the Lao People's Democratic Republic signed five MoUs to implement Quick Impact Projects in education, health, water facilities, and IT during the 3rd round of Foreign Office Consultations. The signing took place in Vientiane, Lao PDR, with Secretary (East) Shri Saurabh Kumar leading the Indian side and Deputy Foreign Minister Mr Phoxay Khaykhamphithoune heading the Lao PDR delegation. The projects aim to foster collaboration and strengthen ties between the two nations, enhancing development in various crucial sectors.

## ECONOMY

### Three New FTOs in MP to Boost Training and Employment Opportunities

Minister for Civil Aviation, Shri Jyotiraditya M Scindia, inaugurated three Flight Training Organisations (FTOs) in Khajuraho, Madhya Pradesh: (i) Indian Flying Academy, (ii) Flyola Aviation Academy (Jet Serve Aviation Pvt. Ltd.) - Helicopter FTO, and (iii) Flyola Aviation Academy (Jet Serve Aviation Pvt. Ltd.) - Fixed Wing FTO. The Indian Flying Academy is equipped with five aircraft and has the capacity to train 40

students per batch. The Flyola Aviation Academy's Helicopter FTO is Asia's first Commercial Helicopter Pilot License Training Institute. The Flyola Aviation Academy's Fixed Wing FTO offers high-performance aircraft training and can accommodate 20 cadets per batch. These new academies not only promote skill development but also contribute to the growth of the aviation industry, providing a platform for young talents to pursue fulfilling careers in aviation.

### National Health Authority Launches Microsites Project to Boost Digital Health Adoption

The National Health Authority (NHA) has taken a significant step towards enhancing healthcare accessibility through digital means by introducing the 100 Microsites Project under the Ayushman Bharat Digital Mission (ABDM). The project aims to create clusters of small and medium-sized health facilities fully compliant with ABDM standards, offering digital health services to patients. A Microsite, in the context of ABDM, constitutes a collection of clinics, nursing homes, hospitals, labs, pharmacies, and other healthcare facilities that have adopted ABDM-enabled digital health services. Development partners and interfacing agencies may be leveraged by State/UT to set up and run these Microsites. ABDM enabled applications will be installed in these facilities, enabling digital health services for patients.

## SPORTS

### India Hosts Asian Youth and Junior Weightlifting Championships 2023

Union Sports Minister, Shri Anurag Singh Thakur, inaugurated the prestigious Asian Youth and Junior Weightlifting Championships 2023 in Greater Noida. This international event, being hosted in India for the first time, witnesses over 30 Indian weightlifters, including many talented Khelo India Athletes. Shri Thakur expressed delight at India hosting more than 15 Asian nations, 200 athletes, and over 50 technical staff and coaches in this tournament. The event aims to celebrate the growth of sports in India and showcase the remarkable achievements of Indian weightlifters.

### India Protests China's Stapled Visas for Arunachal Athletes

India has lodged a strong protest with China over the issuance of stapled visas to sportspersons from Arunachal Pradesh. The Ministry of External Affairs spokesperson, Shri Arindam Bagchi, expressed India's displeasure over the discriminatory treatment and reiterated that Indian citizens holding valid passports should not face any differentiation based on domicile or ethnicity. He said India reserves the right to respond suitably to such actions. The protest reaffirms India's consistent stance on fair treatment for its citizens in the visa regime and underscores the importance of non-discriminatory visa practices.
